

OE 506 COLOR

Universal processor for colour microfilm

Product Advantages

Compact continuous dry-to-dry processor that handles microfiche and films in rolls - leaderless - and achieves an excellent processing quality, especially made for CIBACHROME Micrographic Film and process P-5

The same applies to CIBACHROME Copy Paper that can equally well be processed in this machine

Leaderless roller transport, safe film transport across the machine, film transport with virtually no carry-over nor contamination of chemistry

automatic cut-off system for saving of water and electrical power

precise scanning system (infrared) for reading of the film surface for replenishment control

exact solution replenishment

easy maintenance
